DCA meets monthly by Zoom.

Everyone is welcome!

The Dalhousie Community Association acknowledges that it is located on the traditional and unceded Algonquin Anishinaabe territory. As settlers, we recognize the Algonquins as the customary keepers and defenders of this land, and we honour their long history of welcoming many Nations to this beautiful territory.

## TIME TO TAKE ACTION!

The DCA is a volunteer association that works to improve our neighbourhoods of Little Italy and Chinatown

Come help us make our community great!

Find out more about us at

# WHAT WE DO

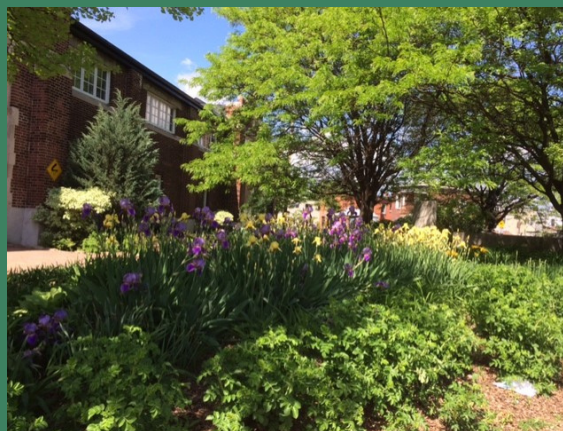

**Our goal is to enhance the quality of life for the Dalhousie community.**

We do this through committees such as:

- **Peaceable Neighborhood:** we work with our community partners on issues that affect the safety of everyone who lives, works, and plays in our community.
- **Plan Our Neighborhood:** we look at the impacts of new development proposals on our neighbourhood and communicate our concerns to City Hall. Our goal is to ensure inclusive and sustainable growth that recognizes the strength and history of our neighbourhood.
- **Public Realm :** we work to ensure that Dalhousie residents have a healthy environment with green spaces and places to play for all ages.

We also have committees that look at issues such as **Mobility** (how we move around our neighbourhood) and **Messaging Out** (social media, The Buzz Newspaper).

## GREEN SPACES

Our community has the fewest trees of any Ottawa neighbourhood. And... the City has approved developments that could double our population.

Help us ensure we have more parks and places for people to play.

Green spaces have many positive impacts on the urban environment. They help human health, provide shade and reduce air pollution and the impact of flooding.

Green spaces are essential in every community!

We need your help to protect and increase ours!

# CURRENT PROJECTS

## 31 Rochester St. Ottawa.

Community gardens are a place that gives our community an opportunity to grow food and connect with nature.

Our current project is developing the plot on 31 Rochester. We hope to do this with partners like CCOC, SWCHC and the Ottawa Community Land Trust.

This would add to our existing DCA gardens (Preston & Somerset, Plant Rec. Centre, 755 Somerset) as well as the "guerrilla gardening" done by volunteers on our streets.
